In the face of global power shifts, climate change, and rapid technological disruption, the perception of individual freedom has been called into question. We believe that it is crucial to rethink which aspects of freedom have to be recalibrated and which ones need to be defended.

The St. Gallen Symposium is the world’s leading initiative for intergenerational debates on economic, political, and social developments. We bring together key decision makers, thought leaders, and brilliant young minds to address current challenges and opportunities on transforming ideas into action. We are a student-run initiative combining excellence with innovation: A unique and extraordinary experience.

Freedom Revisited

In the face of global power shifts, climate change, and rapid technological disruption, the perception of individual freedom has been called into question. We believe that it is crucial to rethink which aspects of freedom have to be recalibrated and which ones need to be defended.
